DESIGN SYSTEM / MODULE 03

Every level.
Clearly explained.

Interactive trading examples, downloadable training videos and implementation rules for the IWM Academy website.

THE VISITOR SHOULD UNDERSTAND IN 10 SECONDS

ENTRY	STOP LOSS	TARGET 1
$124.50	$118.75	$133.00

Swing Trading Desk / fictional buy example - no real price or return

DELIVERABLES IN THE ZIP

1. Standalone interactive HTML page 2. Five synthetic trade scenarios 3. Two silent, captioned MP4 demonstration videos 4. Captions, posters and JSON data 5. This developer guide.

IMPORTANT: The sample numbers, price paths and trade outcomes in this package are invented solely to demonstrate product presentation. Nothing is live, backtested, or investment advice.

01 / USER-FIRST EXPERIENCE

One page. Zero confusion.

The examples page is a trust-building product preview, not a complex trading terminal or a substitute for the subscription checkout.

01 **Arrive**

Royal Green identity and one prominent promise: every level is clear.

02 **Choose desk**

Five accessible strategy tabs. Swing Trade is included.

03 **Understand**

Entry, stop, two targets, exit and status are visible at once.

04 **Walk the trade**

Tap Plan, Entry, Update and Exit to see the example progress.

05 **Watch or download**

Play the built-in sample video or download the matching MP4.

06 **View memberships**

One clear CTA to the real subscription page. No fabricated prices.

Mobile priority: the same content stacks vertically; pricing never appears as an unverified amount.

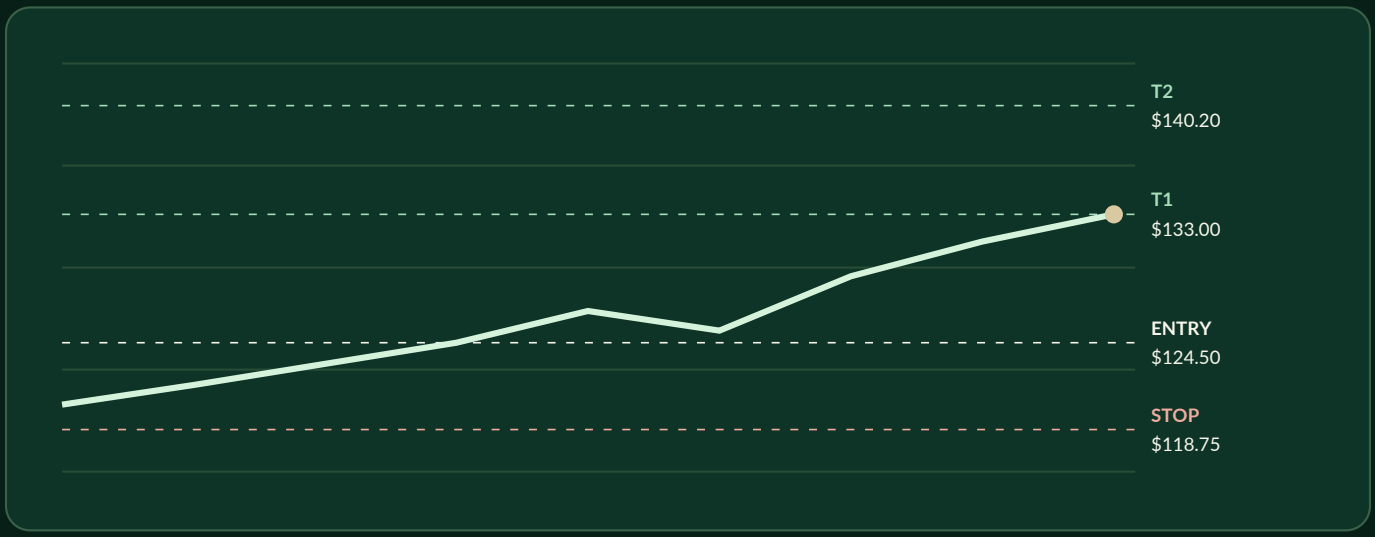

02 / EXACT TRADE EXAMPLE

Swing Trading / Buy to Sell

A complete sample trade card must distinguish planned levels from the illustrative executed exit.

FICTIONAL LONG SETUP

BUY ENTRY	STOP LOSS	TARGET 1	TARGET 2
$124.50	$118.75	$133.00	$140.20

EXAMPLE SELL / EXIT	PLANNED RISK / SHARE	SIMULATED OUTCOME
$133.00	$5.75	+1.48R

EXPLAIN THE TRADE: Buy at the sample entry ($124.50). The initial stop is $118.75. If Target 1 is reached, the fictional position is sold at $133.00. Target 2 remains an unachieved planned level. Outcomes exclude fees and slippage.

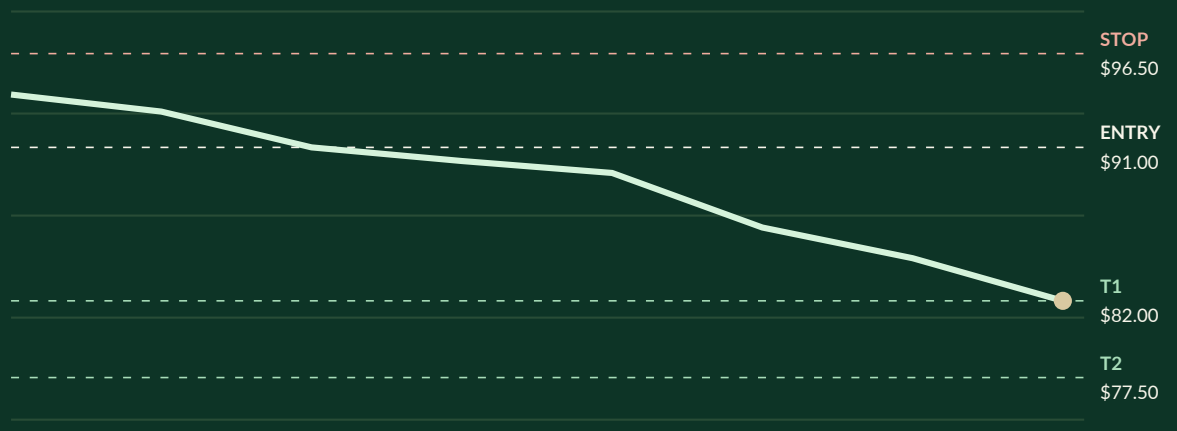

03 / EXACT SHORT EXAMPLE

Tough Market / Short to Cover

Short positions reverse the logic: sell short to open, buy to cover to close; the stop sits above the entry.

FICTIONAL SHORT SETUP

SELL SHORT	STOP LOSS	COVER TARGET 1	COVER TARGET 2
$91.00	$96.50	$82.00	$77.50

BUY TO COVER / EXIT	PLANNED RISK / SHARE	SIMULATED OUTCOME
$82.00	$5.50	+1.64R

EXPLAIN THE TRADE: The hypothetical position sells short at $91.00 and places a risk boundary at $96.50. At the fictional exit of $82.00, the short is covered. Short positions have special borrowing, execution and loss risks; do not describe them as ordinary buy orders.

04 / COMPLETE THE OFFER

All five trading desks

Additional examples deliberately include a losing trade and an unfilled plan, rather than only profitable examples.

LARGE-CAP & AI

An illustrative Target 1 exit

ENTRY $215.40 **STOP** $206.20 **TARGETS** $230.00 / $241.60

EXIT AT $230.00 | +$14.60/share | +1.59R

SMALL-CAP MOMENTUM

A stop loss is reached

ENTRY $18.40 **STOP** $17.10 **TARGETS** $20.30 / $22.10

STOPPED OUT AT $17.10 | -$1.30/share | -1.00R

EARNINGS & EVENTS

An order is never opened

ENTRY $66.00 **STOP** $61.80 **TARGETS** $71.20 / $76.40

UNFILLED - NO ENTRY, NO EXIT, NO P/L

Data model rule: cancelled plans must never be included in trade win rates. Stopped-out setups must remain visible in the archive. Real trades need timestamps, reason for change and verified source evidence.

05 / INTERFACE BEHAVIOUR

Exactly what users can do

Keep the public demonstration easy enough for a first-time visitor to understand without a tutorial.

Five desk tabs

Switch the entire trade card, descriptions, status and chart. Default: Swing Trade.

Four stage buttons

Plan / Entry / Update / Exit. Recalculate the visible synthetic price path.

Five price fields

Entry, stop, Target 1, Target 2, exit. Labels differ for long and short.

Status and outcome

Target achieved / stopped out / cancelled. Never default cancelled to $0 P/L.

Risk summary

Risk = absolute(entry - stop). R = simulated P/L per share divided by planned risk.

Video buttons

Native video player; clear Download MP4 link; caption track and poster.

View memberships

Prominent CTA to actual membership catalog; prices come from server, not page markup.

06 / DOWNLOADABLE VIDEO SECTION

Play. Learn. Download.

Two original silent MP4 examples are included in the package. Both contain on-screen text and fictional price levels.

01 / BUY - SWING TRADING

sample_buy_trade.mp4

Buy $124.50 | Stop $118.75 | Target $133.00 | Example sell $133.00

PLAYER / DOWNLOAD MP4 / TEXT CAPTIONS

02 / SHORT - TOUGH MARKET

sample_short_trade.mp4

Sell short $91.00 | Stop $96.50 | Cover target $82.00 | Cover exit $82.00

PLAYER / DOWNLOAD MP4 / TEXT CAPTIONS

PRODUCTION DELIVERY RULES

01 Store MP4 URL, poster URL, subtitle URL, video title and download permission in the CMS.

02 Send Content-Type: video/mp4; support byte-range requests for streaming and seeking.

03 For download links, return Content-Disposition: attachment; use signed links for paid-only videos.

04 Keep these 2 examples public. Protect any future premium videos with real membership checks.

05 Use copyright-cleared owned material only; add real trade recordings later only with evidence and permissions.

07 / ENGINEERING CONTRACT

Data, states and access

Treat every trade as a versioned record. The public sample is not a brokerage execution interface.

SUGGESTED RECORD FIELDS

id, desk_id, demo_flag, direction [LONG|SHORT]

instrument_label, symbol (optional), currency, price_precision

entry_price, stop_price, target_1, target_2, exit_price (nullable)

status, created_at_utc, published_at_utc, closed_at_utc

planned_risk_per_share, outcome_per_share (nullable), r_multiple (nullable)

trade_notes, change_history[], exit_reason, video_asset_id (nullable)

visibility [PUBLIC_DEMO|MEMBER_ONLY], access_desk_ids[]

SUGGESTED WORKFLOW

Plan	Drafted / scheduled / published, with a full initial set of prices.
Active	Entry conditions met; event recorded with authoritative timestamp.
Updated	Any stop / target revision creates a new version, never overwrites history.
Closed	Exit reason, closing price, and whether partially or fully closed.
Cancelled	No entry: show "not filled" and do not fabricate a P/L or trade result.

08 / ACCEPTANCE CRITERIA

Ready for your engineer

The following items are required before the module is placed on the live IWM Academy website.

☐	BRAND	Royal Green, prominent IWM Academy wordmark, full name visible and responsive.
☐	DESKS	All 5 strategies: Swing, Large-Cap & AI, Small Cap, Earnings, Tough Market.
☐	PRECISION	Entry, stop, 2 targets, exit and outcome use 2 decimals and correct trade direction.
☐	RISK	Stopped-out and cancelled plans render accurately; no misleading default win rates.
☐	INTERACTION	All desk tabs and four stage buttons work with mouse, keyboard and touch.
☐	VIDEO	Both MP4s play, download, show posters and expose captions.
☐	SECURITY	Public demo cannot unlock actual paid research or trigger real broker trades.
☐	CHECKOUT	Actual membership prices, period, auto-renewal and taxes load from the real backend.
☐	TESTING	Test mobile widths, Safari/Chrome/Firefox, zoom, slow connection and missing MP4.
☐	COMPLIANCE	Demo labels visible; legal disclosures and jurisdictions reviewed before launch.
