THE LEARNING ECOSYSTEM / DESIGN RELEASE 02

A distinguished home for financial education.

A complete responsive website concept, inspired by the supplied academic reference. Royal Green identity, a gold-accented ecosystem hero, five Learning Labs, and exactly two access durations.

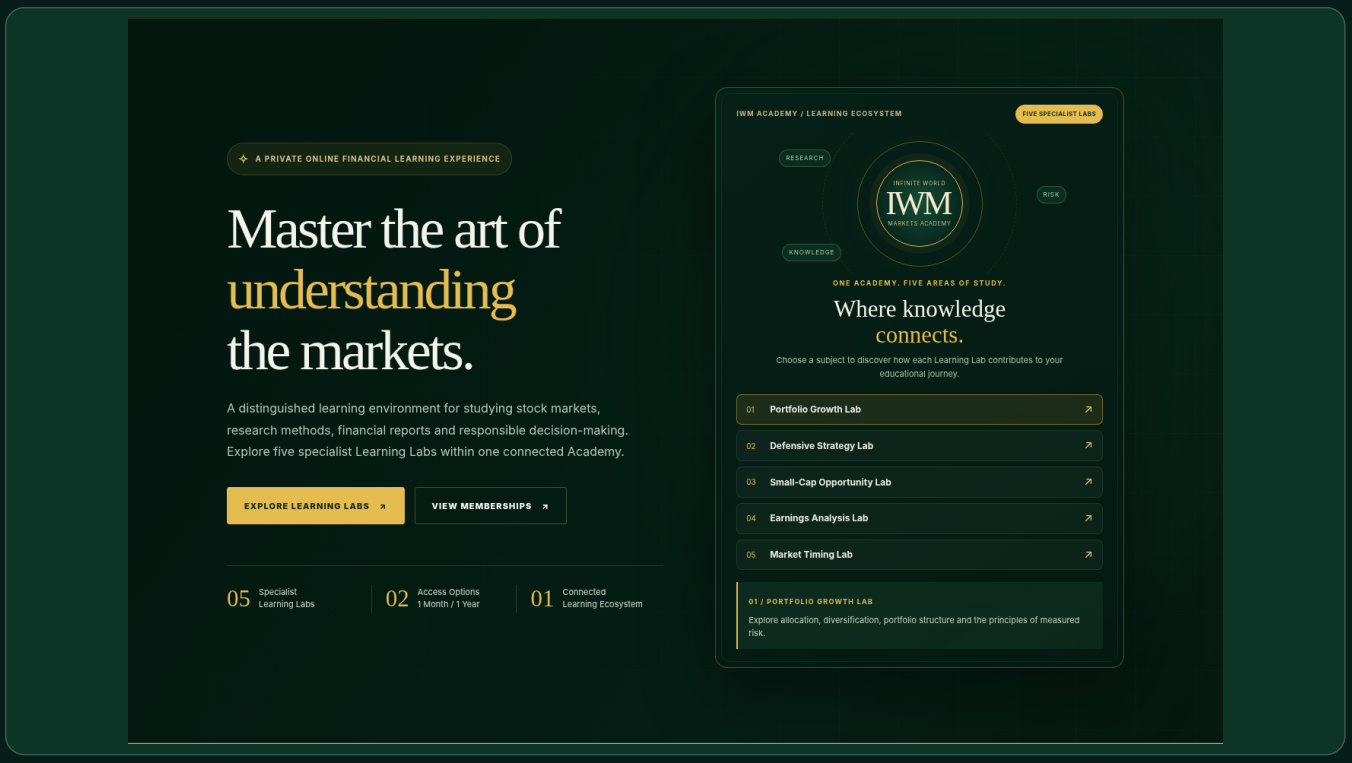

INTERACTIVE DESKTOP + MOBILE

IMPLEMENTATION HANDOFF / CONTENT / INTERACTIONS / PAYMENTS / QUALITY

01 / PRIMARY VISUAL DIRECTION

A premium academic first impression.

The reference is interpreted through a two-column composition: editorial typography on the left and a custom IWM learning ecosystem on the right.

- **Left: powerful editorial introduction**

  Gold-and-ivory serif heading, verified educational positioning, two clear destination buttons and feature counts.

- **Right: interactive ecosystem panel**

  Original IWM medallion, concentric rings, five selectable learning subjects and a descriptive active state.

- **No imitation faculty profile or fabricated numbers**

  Never show a professor, degree, success rate, testimonial or student count unless verified and authorised.

02 / INTERACTIVE ECOSYSTEM

One academy. Five connected labs.

The visual represents a learning network, not an investment dashboard or financial-performance terminal.

ECO SYSTEM STRUCTURE

- FOUNDATIONS
- RESEARCH
- RISK
- FIVE LEARNING LABS
- STUDENT ACCESS

- **State: selected lab**

  On tap or click, highlight the chosen row and update title, description and number in the panel.

- **Data source: stable catalog records**

  Use five unique internal IDs; keep names, summaries and eligibility centralised in the content system.

- **Accessible controls**

  Use keyboard-operable buttons, visible focus states, aria-pressed, and live-region feedback.

- **Destination: same-page learning detail**

  The CTA leads to Learning Labs or an accurate, product-specific information page, not direct brokerage action.

03 / DESIGN SYSTEM

The Royal Green signature.

Retain the luxury identity while borrowing the reference image's balance of deep green, warm gold and refined academic typography.

FOREST BASE

DISPLAY FONT

A thoughtful way to learn.

BODY FONT

Accessible sans serif for course descriptions, labels, dashboards, checkout and explanatory content.

Radius: 7-16 px / Hairline borders / Quiet transitions / Gold as a focused accent, not a universal fill / Substantial whitespace

04 / PROGRAM DIRECTORY

Five specialist Learning Labs.

All five are visible in the ecosystem panel, program directory, memberships area, checkout and student access entitlements.

01 **Portfolio Growth Lab**

Portfolio structure, allocation, diversification, review and risk awareness.

CMS KEY: portfolio | EXISTING ACCESS IDENTIFIER: 200K

02 **Defensive Strategy Lab**

Market uncertainty, downside planning, resilience and decision-making.

CMS KEY: defensive | EXISTING ACCESS IDENTIFIER: Tough Market

03 **Small-Cap Opportunity Lab**

Company research, liquidity, filings and analytical limitations.

CMS KEY: smallcap | EXISTING ACCESS IDENTIFIER: Small Cap

04 **Earnings Analysis Lab**

Financial statements, corporate results, reports and market context.

CMS KEY: earnings | EXISTING ACCESS IDENTIFIER: Earnings

05 **Market Timing Lab**

Price behaviour, time horizons, scenario evaluation and risk considerations.

CMS KEY: timing | EXISTING ACCESS IDENTIFIER: Swing

Internal mapping is for migrating existing memberships and Discord permissions. Public names must describe the actual subjects and services available.

05 / WEBSITE HIERARCHY

A complete learning journey.

Every primary navigation item scrolls to an actual section. The full website continues below the hero; the ecosystem is its focal point, not its only component.

01 **Discover**
Academic hero, ecosystem network and clear educational promise.

02 **Explore**
Curriculum pathways and five specialist labs.

03 **Understand**
Interactive hypothetical case studies with balanced outcomes.

04 **Select**
Choose a lab, then one month or one year of access.

05 **Review**
See the verified price, what is included and all billing terms.

06 **Access**
Student portal shows modules, community access and membership status.

06 / MEMBERSHIPS

Only two access durations.

The duration switch is visible on the memberships section and stays synchronised with the review modal, checkout and student billing screen.

TERM 01

1 Month Access

One-month period; exact billing price, currency and any renewal terms shown before payment.

PRICE: SERVER VERIFIED

TERM 02

1 Year Access

Annual period; verified annual charge, discount basis and renewal terms shown before payment.

PRICE: SERVER VERIFIED

REQUIRED DATA CONTRACT

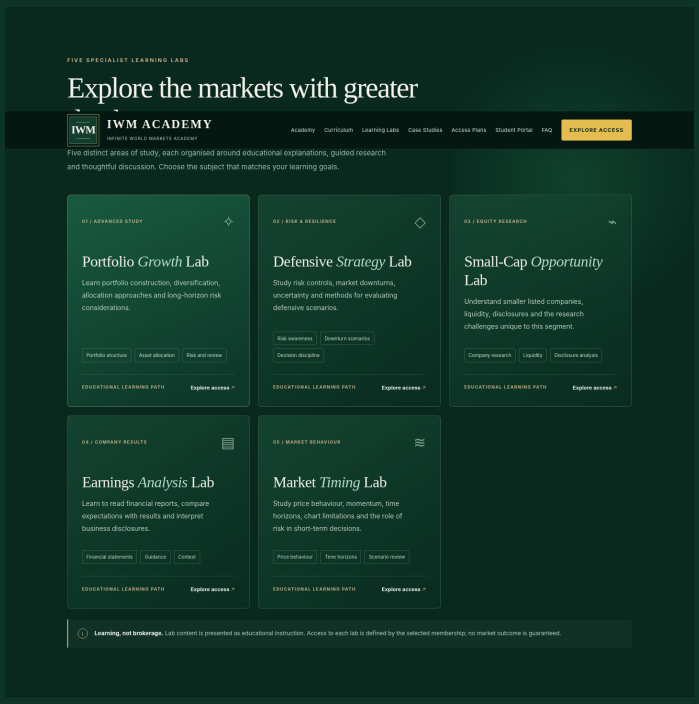

- term_code in {MONTH_1, YEAR_1}; do not expose any other duration.
- product_id comes from one of the five approved Learning Lab identifiers.
- Use the provider-backed catalog for amount, currency, taxes, inclusions and terms.
- State if renewal is automatic; show next charge date and cancellation method.
- Verify payment server-side before granting Discord or student portal access.

This prototype does not take payments. Placeholders are intentional and must be replaced with verified, current billing information.

07 / EDUCATIONAL CONTENT

Learn by exploring examples.

Retain interactive research lessons, the three core curriculum pathways and both positive and negative hypothetical outcomes.

- **Foundations / Research / Risk**

  Three structured curriculum areas, each with units, learning goals and a transparent teaching format.

- **Clearly fictional case studies**

  Every example identifies hypothetical data; include losses and unfilled scenarios where applicable.

- **Preserve educational integrity**

  No unverified performance statistics, unrealistic profit claims or retrospective returns presented as guarantees.

08 / STUDENT EXPERIENCE

From enrollment to learning.

A genuine product ecosystem joins lessons, discussions, member resources and clear billing status without disguising the services delivered.

STUDENT PORTAL

Learning Overview	Progress and educational modules
My Lessons	Course material, replays and resources
Learning Community	Role-gated Discord learning access, where included
Membership & Billing	Term, next renewal, receipts and cancellations

- **Account permission model**

  Maintain a member-to-product entitlement record and revoke access when the paid entitlement ends.

- **Discord must reflect the actual learning service**

  Only assign community roles based on confirmed payment and relevant entitlement; remove stale roles automatically.

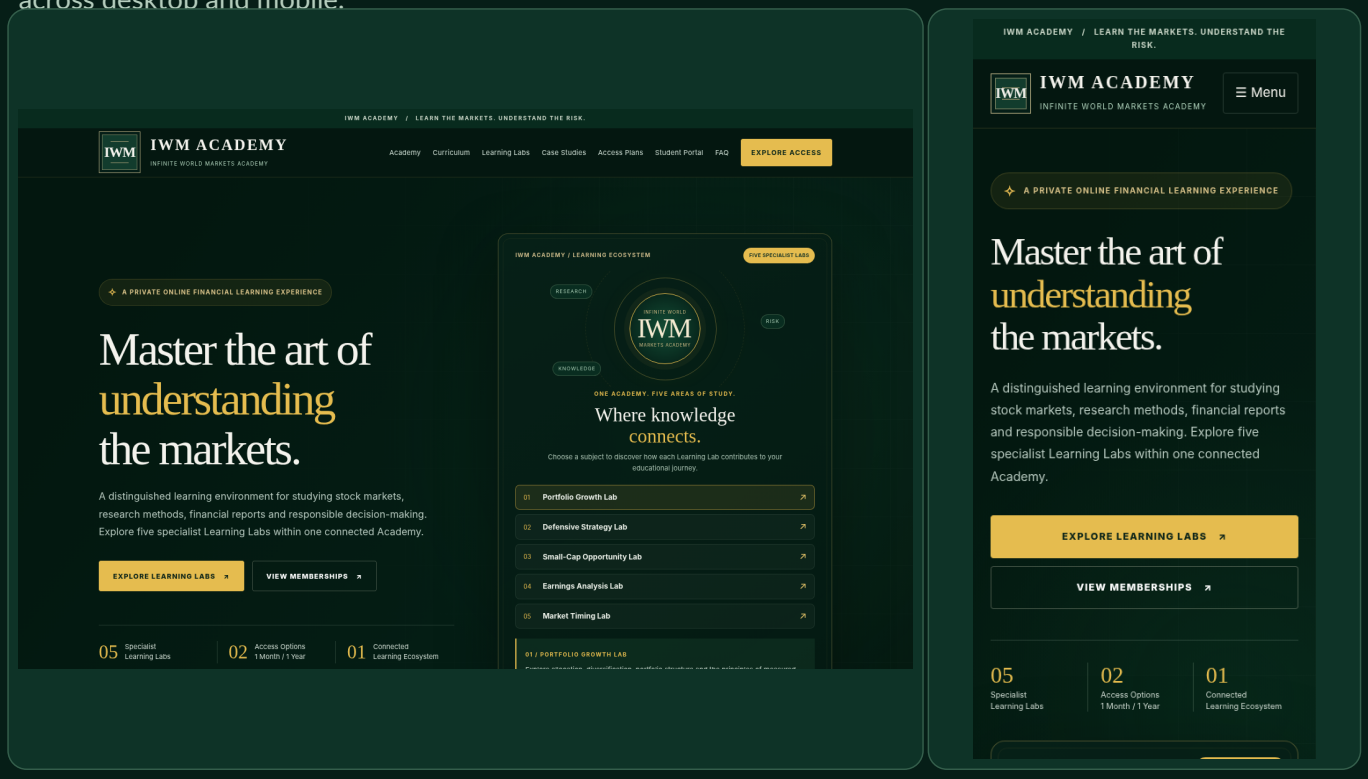

- **Billing and customer support**

  Provide confirmation emails, receipts, cancellation links, support contact and audit log.

09 / RESPONSIVE EXPERIENCE

Beautiful at every screen size.

The hero, learning diagram, membership cards and portal navigation should remain legible and functional across desktop and mobile.

- **Desktop, 1024 px and above**

  Two-column hero. Right panel stays fully interactive and retains enough room for five lab rows.

- **Tablet and mobile**

  Stack narrative above the ecosystem; full-width gold primary CTA, clean card spacing and no horizontal scroll.

- **Access and visual testing**

  Contrast, keyboard focus, touchscreen, 200% zoom, supported browsers and portrait layouts.

10 / PAYMENT-REVIEW READINESS

Credibility comes from accuracy.

The layout is designed to communicate education clearly. Merchant approval depends on the true underlying activities, payment history and a processor's independent policies.

PRODUCT REPRESENTATION

Course titles, descriptions, live-session format and learning-community benefits must match services actually delivered.

NO FABRICATED INSTITUTIONAL CLAIMS

Never invent an instructor identity, academic qualifications, ratings, student counts, certification or affiliations.

TRANSPARENT BILLING

Display price, recurring-charge consent, annual term, cancellations, refunds, tax and support before payment.

MARKET CONTENT DISCLOSURE

If members receive actionable securities recommendations or live alerts, disclose them accurately and seek applicable regulatory review. Renaming them as lessons is not sufficient.

CUSTOMER SUPPORT & DISPUTE EVIDENCE

Show provider identity and contact details; retain payment confirmation and evidence that paid learning access was delivered.

11 / ENGINEERING ACCEPTANCE

Ready for implementation.

Validate these requirements before release. The supplied HTML is a browser preview; back-end systems remain engineering work.

- [ ] Royal Green, ivory and champagne palette; correct plural brand spelling.
- [ ] Gold-accented two-column ecosystem hero, five focusable buttons and live description.
- [ ] All five lab names and mappings match the current membership catalog.
- [ ] Exactly MONTH_1 and YEAR_1 terms; no alternative duration appears in any flow.
- [ ] Accurate prices, inclusions, taxes, renewal terms and refund policy before payment.
- [ ] Server-verified purchases; secure customer accounts and role-based learning access.
- [ ] Clear labels for hypothetical examples and full outcome/risk context.
- [ ] Verified business identification, support, privacy policy and consumer terms.
- [ ] No fabricated testimonials, success rates, credentials or investment outcomes.
- [ ] Responsive, accessible on touch/keyboard, mobile browser tested and no overflow.

PACKAGE CONTENTS

Editable website: index.html / assets/styles.css / assets/ecosystem.css / assets/app.js. Standalone single-file preview. Desktop/mobile screenshots. This 12-page engineering PDF.
